ANNEXURE - I

Base Map

The Hon'ble Supreme Court of India, Justice Dalveer Singh in response in response to Writ Petition (Civil) No.483 of 2004, Avinash Mehrotra vs Union of India has laid down the following minimum specifications for school buildings:

3.3 SCHOOL BUILDING SPECIFICATIONS:

- i. The school buildings shall preferably be a 'A' Class construction with brick/stone masonry walls with RCC roofing. Where it is not possible to provide RCC roofing only non combustible fireproof heat resistance materials should be used.
- ii. The nursery and elementary schools should be housed in single storied buildings and the maximum number of floors in school buildings shall be restricted to three including the ground floor
- iii. The School building shall be free from inflammable and toxic materials, which if necessary, should be stored away from the school building.
- iv. The staircases, which act as exits or escape routes, shall adhere to provisions specified in the National Building Code of India 2005 to ensure quick evacuation of children.
- v. The orientation of the buildings shall be in such a way that proper air circulation and lighting is available with open space all around the building as far as possible.
- vi. Existing school buildings shall be provided with additional doors in the main entrances as well as the class rooms if required. The size of the main exit and classroom doors shall be enlarged if found inadequate.
- vii. School buildings have to be insured against fire and natural calamities with Group Insurance of school pupils
- viii. Kitchen and other activities involving use of fire shall be carried out in a secure and safe location away from the main school building.
- ix. All schools shall have water storage tanks.
